## DEMOLITION PERMIT INFORMATION SHEET

Prior to submitting an application for a demolition permit, please review the following. Because the extent of demolition work can vary greatly, it is recommended that an applicant meet with the building official to discuss the relevant requirements for each specific application.

The applicant is responsible for each of the following:

- Contacting the local utilities to disconnect any utility services. The applicant will need to work directly with each utility.
- Demolition of many types of buildings will require an asbestos survey to be conducted and submitted to the Texas Department of State Health Services Asbestos Program. (<http://www.dshs.state.tx.us/asbestos/default.shtm>) If an asbestos survey is required, proof of submission to the state must be included with the demolition permit application to the City of Sanger.
- Using IESI for solid waste collection (see contact information below).
- Maintaining erosion control measures in place during and after demolition activity, until the passing of final inspection.
- Calling for a final inspection once demolition work has been completed.
